

A Year's Worth of Lessons for K-1

CoreFocus by Hatch® provides teachers with more than 2,400 research-based activities plus intuitive organization and lesson-planning tools on state-of-the-art interactive hardware. The playful and purposeful activities are designed by early-childhood experts and aligned with the Common Core State Standards. CoreFocus offers strategies that reflect the latest research to help strengthen skills in literacy and math.

Skill Development Areas

Mathematics

- Counting
- Operations & Algebraic Thinking
- Data & Measurement
- Geometry

Skill Connections

- Games
- Charts
- Compare & Contrast

Literacy

- Print Concepts
- Reading Aloud
- Alphabet Knowledge
- Phonological Awareness
- Phonics
- Language
- Storytelling
- Writing

CoreFocus is a comprehensive interactive board solution with standards-focused content and robust tools for instruction, planning and progress monitoring.

CoreFocus activities meet Common Core State Standards, and each activity provides details describing how it ties to those standards. Teachers can focus instruction by searching the interactive Teaching Guide for content that is focused on a particular standard or skill.

Lesson Planning

CoreFocus includes an interactive Teaching Guide that clearly organizes activities. The Teaching Guide can be keyword searched or browsed by standards or skill categories. Teachers can create weekly schedules for individuals or groups and access a day's activities from the integrated calendar.

Customize Activities

Use CoreFocus technology to modify activities to meet the specific needs and interests of your children. Step-by-step instructions guide teachers through the "Make it Your Own" process, allowing them to build "My Content" activities from easy-to-use templates. Custom activities are saved and searchable.

Individual Portfolios

Teachers and students are able to save authentic work samples in a digital portfolio that can be revisited later for assessments, IEP documentation and parent conferences. Digital portfolios allow teachers to follow a child's progress over time.

Beyond the Technology

CoreFocus features hands-on teaching strategies and ideas to support focused instruction in the classroom.

HatchEarlyLearning.com/CoreFocus

Two hardware options are available.

Hatch Display: a multi-touch 55" HD touchscreen display tracks the movement of a small child's hand, even before it touches the screen.

Differentiated Learning with Lesson Planning & Content Management Tools

INCLUDES:
2,400+
RESEARCH-BASED
ACTIVITIES

A Powerful Tool Set for the Classroom

CoreFocus develops math and literacy skills by utilizing scaffolded development levels. Scaffolded lessons provide opportunities to differentiate learning based on a student's level of instruction in literacy and mathematics.

CoreFocus offers a step-by-step lesson plan for each activity. These lesson plans recommend group size, the skills addressed and a brief teacher "how to." Audio instructions are recorded by a certified speech pathologist to support independent play.

Professional Development

To ensure CoreFocus is optimally integrated into the classroom, Hatch consultants provide a professional development session for teachers. Training topics include research basis, Common Core State Standards, navigating CoreFocus, monitoring progress and taking lessons beyond the technology. Additionally, all customers will have 24/7 access to online courses.

Why Hatch Technology?

With 30 years of experience and a team of world-renowned early education experts, Hatch is the most widely-used early-learning technology provider nationwide. We invite you to experience our products today to see how Hatch can transform your classrooms!

Hatch Whiteboard: a durable 75" interactive whiteboard with updated safety features, exclusively designed to withstand the rigors of the classroom.
