

HATCHABLES

ESSENTIAL SKILL KITS

JUST
\$40
EACH

Little Kits with a Lot of Learning

Hatchables make it easy for teachers to create engaging personalized learning experiences within flexible groups. Each kit gives teachers step-by-step instructions, extensions and assessment guidance in video format using the included hands-on materials.

Hatchables kits enhance teacher-student interactions during small group activities. Each Hatchables kit corresponds to one of 16 research-proven math or literacy skills addressed by the Hatch software and shown in the reporting system. When progress reporting indicates that a child or group of children are struggling with a specific skill, teachers can use the technology to refocus the activities presented by the software. Now, Hatchables make it easy for teachers to also refocus learning and reinforce skills using traditional classroom materials and group activities!

LITERACY SKILLS

Letter Recognition

Prompt children to sort, match and identify lower and uppercase letters.
683001

Initial Sounds

Choose pictures matching an initial consonant sound.
683005

Sentence Segmenting

Recognize two- or three-word sentences with pictorial support.
683000

Language Vocabulary

Play a detective game while improving language vocabulary.
683004

Start Building Your Hands-On Learning Library Today!

MATH SKILLS

Sorting

Prompt children to sort objects by attributes (color and type).

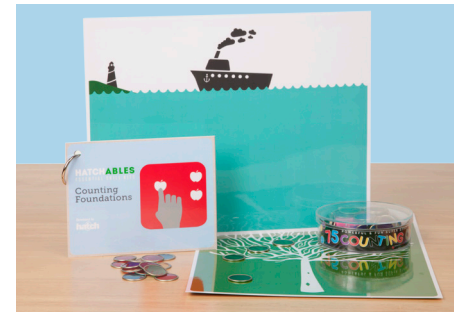

683009

Spatial Skills

Support the development of spatial (position words) vocabulary.

683008

Counting Foundations

Review one-to-one correspondence and counting objects in sequence.

683003

Numerical Recognition

Children recognize, sequence, and count numerals from one to twenty.

683006

Common Shapes

Recognize and distinguish common shapes and their attributes.

683007

Hatchables in Action

How-to videos are included to give teachers step-by-step instructions, extensions and assessment guidance.

Connecting the Classroom to RMS

Hatchables activities are designed to enhance and complement the skills children are already familiar with from playing Shell Squad Games on Hatch tablets and computers. The included teacher's guide, how-to videos and step-by-step instructions make it easy to turn data from Progress Monitoring Reports in the Hatch Report Management System (RMS) into fun and engaging small group lesson plans.
