

Not all tablets are created equal.

Early learning experts at Hatch designed **iStartSmart Mobile** specifically for classroom use with pre-loaded, award-winning software applications that develop 18 core school readiness skills and support Head Start domains.

Classroom Tablets should be Teaching Tools, not Toys.

Most iPads are used inappropriately in classrooms, simply filling free time or offering children a random assortment of downloaded, disconnected apps.

iStartSmart Mobile teaches early literacy and math skills through sequenced lessons. Children automatically progress through levels in an individualized, intentional learning environment. Education experts developed the software application based on current research that tells us how young children learn best.

The choice is simple.

With all the functionality and power of an Android tablet in a kid-safe environment, iStartSmart Mobile by Hatch is the best solution for the early learning classroom

Professional Training

✓ Hatch Tablet ✗ iPad

Hatch experts train teachers & administrators on how to use the technology and integrate into curriculum.

Reports in the Cloud

✓ Hatch Tablet ✗ iPad

Teachers and administrators can view real-time progress data anytime, from anywhere with an Internet connection.

Independent Login

✓ Hatch Tablet ✗ iPad

Young children easily login independently using their own photo with patent-pending technology by Hatch.

Meets Standards

✓ Hatch Tablet ✗ iPad

iStartSmart Mobile activities are based on scientific research and tie to state & national standards.

Device Management

✓ Hatch Tablet ✗ iPad

All devices are tracked so educators can view where tablets are located and how they are being used.

Monitors Progress

✓ Hatch Tablet ✗ iPad

Performance data is collected automatically and activities increase or decrease in difficulty based on skill level.

Ten Reasons Why iSS Mobile Can and iPad Can't.

<p>1. Deployment Support</p>	<p>Technology professionals frontload the system, load software applications and distribute and install the technology in classrooms.</p>
<p>2. Professional Development for Effective Use of Tablets</p>	<p>Certified trainers with field experience and in-depth product knowledge train teachers and administrators to use the tablets and reports effectively by integrating them into existing routines.</p>
<p>3. Lifetime Technical Support</p>	<p>Lifetime access to support from technicians dedicated solely to teachers and administrators in early learning environments.</p>
<p>4. Developmentally-Appropriate Interface with Photo Login</p>	<p>Photo ID Logins allow pre-readers to independently launch and use software applications through a kid-safe desktop environment that protects them from inappropriate websites. Children with developing fine motor skills can access programs without swiping motions.</p>
<p>5. Award-Winning Software Applications That Teach</p>	<p>A 2011 EDDIE Award Winner, iStartSmart was designed specifically for preschoolers. Games focus on learning, not winning. The learning goals of the games support school readiness skill development and Head Start domains. Skills are taught in sequential order and lessons are scaffolded.</p>
<p>6. Progress Monitoring</p>	<p>Progress Monitoring reports show each child's progress on the same content, at the same time, across the entire institution. Automatically collected, real-time reports for early learning classrooms provide views of each child's progress as they develop core skills.</p>
<p>7. Seamless Intervention</p>	<p>The scaffolded system provides automatic intervention and instruction based on each response. Children cannot encounter advanced concepts before they show success with foundational skills.</p>
<p>8. Bounce</p>	<p>iSS Mobile Tablets bounce! Exclusively designed for early learning classrooms, the patent-pending HatchGuard™ rubber-padded casing protects the hardware.</p>
<p>9. Investment Protection</p>	<p>A dedicated Hatch support team member monitors how and when your tablets are used. If no one has logged in or uploaded data to cloud-based storage, we proactively contact end users to uncover any possible issues.</p>
<p>10. Proven Return on Investment</p>	<p>Multi-level reporting demonstrates how classrooms, schools and entire districts are performing over time. It's easy to prove that your investment improved school readiness skills with iSS Mobile technology.</p>

Achieve School Readiness Success with Hatch Tablet Technology
