

Connecting Young Minds

WePlaySmart® by Hatch® is a state of the art multi-touch table that provides a cooperative, interactive learning environment for two to four children. Children work together to play games that develop core literacy and math skills and promote the social-emotional and cognitive skills needed for academic success. WePlaySmart by Hatch helps teachers monitor social-emotional development over a school year by recording authentic interactions as children play and providing intuitive assessment tools and reporting for showing progress.

Collaborative Play

Activities in WePlaySmart by Hatch are visible from all positions around the table to ensure engagement of all players. By working together to solve problems, children learn to take turns, follow instructions and be team players. WePlaySmart by Hatch develops skills in four social-emotional areas: executive function social competence, behavior control and emotional control.

Photo Login

WePlaySmart by Hatch is equipped with the Hatch® Authentic Photo Login* that enables valid progress monitoring to occur for each child in the class. The login ensures that each child is presented with scaffolded activities in an individualized learning environment.

*Patent pending.

Children login independently by selecting their own photo.

Skill Building

Activities promote cognitive skill development in a language-rich environment. Children are introduced to 3,000+ vocabulary words during play. More than 250 of the activities focus on STEM concepts like animal life, patterning, recycling and outer space.

Research Basis

WePlaySmart by Hatch activities are based on scientific research and align with national and state standards:

- Head Start Child Development and Early Learning Framework
- Classroom Assessment Scoring System (CLASS)
- Individual state preschool standards

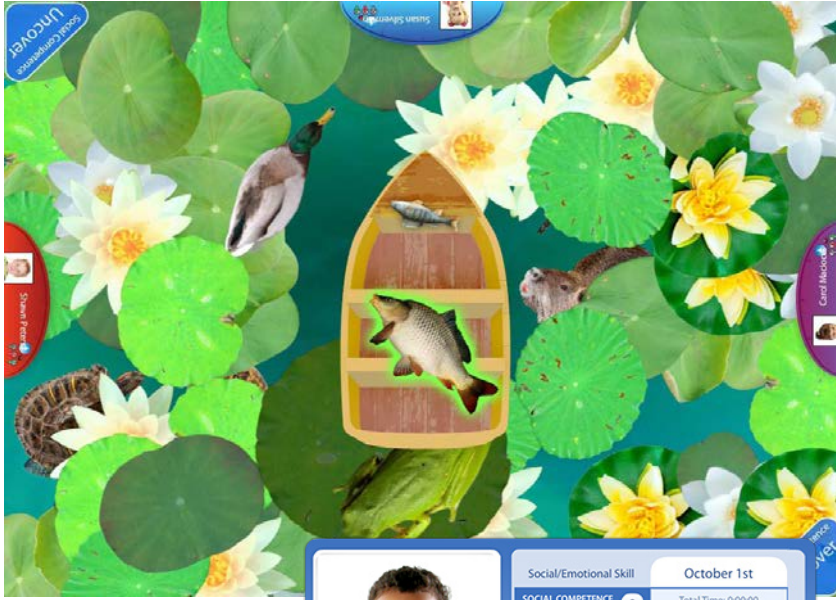

Authentic Data Source

WePlaySmart provides a powerful tool to document progress in the least restrictive, inclusive environment. A built-in, automated progress monitoring system records children's interactions as they play. The recordings represent an authentic data source that shows growth over time at periodic intervals. The system stores a rich library of authentic data for each child.

Audio clips are automatically created.

A Revolutionary Way to Develop & Monitor Social-Emotional Skills

Hundreds of fun, educational games encourage kids to work together and practice critical behavioral skills.

Progress reporting for classrooms and children can be reviewed in the teacher area.

On-Site Training

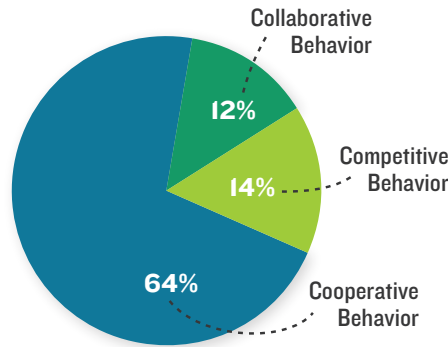

Successful integration of WePlaySmart by Hatch requires proper installation, set-up and training. Hatch® representatives install WePlaySmart by Hatch in the classroom. Comprehensive training is included to ensure the system becomes an active child-directed area in the classroom.

Professional Development

WePlaySmart by Hatch includes free lifetime access to an extensive library of online courses and instructional videos as well as live training webinars to support on-going professional development. With decades of experience and expertise, you can count on Hatch to provide the personal attention necessary to support you and the high quality of education you provide to young children.

Research Shows It Works

A research study determined that preschoolers exhibited cooperation and collaboration after playing in small groups on the WePlaySmart by Hatch multi-touch table. For more details on Hatch technology studies visit: HatchEarlyLearning.com/study

Warranty & Lifetime Support

WePlaySmart by Hatch comes with a two year warranty that covers defects in materials and workmanship from the time of original invoicing. In addition, Hatch Customer Care provides a “one call does it all” approach to supporting your staff via lifetime, toll-free telephone support and email that is always answered promptly. Our website also offers online support with informative documents, videos and FAQs.
